

# HIV Prevention & Care

## KNOW YOUR STATUS!

### How our Health Center can help

- Provide point of care testing and have your results back in 10 minutes.
- Provide follow-up care and additional resources to protect yourself from HIV.
- Make appropriate referrals for ongoing services and care.
- Answer questions you may have about HIV, knowing your status, and prevention

### Why is it important?

- Testing saves lives!!
- Knowing your status can help you and your partner stay healthy.
- Knowing earlier and starting treatment earlier has better health outcomes.
- HIV can be treated & there is medication that can assist with preventing HIV if you are at risk

### How to make an appointment and get tested

- All appointments are confidential
- Call the health center or walk-in and someone can help you.

### Other Health Center services

- Primary Care
- Vision Care
- Dental Care
- Behavioral Healthcare
- Medication Assisted Treatment
- Pharmacy
